Aug. 16, 1927.

Miss Leuline Collier,
State College of Agriculture,
Athens, Ga.

My dear Miss Collier:

I have yours of August 15th. I would be very glad to receive the information, as I am continually reaching out for all data possible regarding the Collier family---the descendants of Isaac Collier who came to American and settled in Brunswick County, Virginia, in the 16th Century.

This branch of the Collier family have been very successful in almost every undertaking in life, yet they have received many reverses after the various wars, but as a rule each family regained their prestige sooner or later. I have written letters to the Colliers all over the country begging them to educate their children and leave the farm. I would appreciate it very much if you would pass the word on down the line, telling them to leave the farm, as there is no future there for them, although you are connected with a State Agriculture College. Make engineers, professional men, etc., out of the male side, and school teachers, and other similar things out of the female side.

I trust to have the pleasure of knowing you personally sometime.

I trust that you know Dr. R. F. Stephens of the State University. He is my wife's brother.

With very kind regards, I remain

Sincerely yours,

JCC:S

J. C. COLLIER.
